

The world is not a country

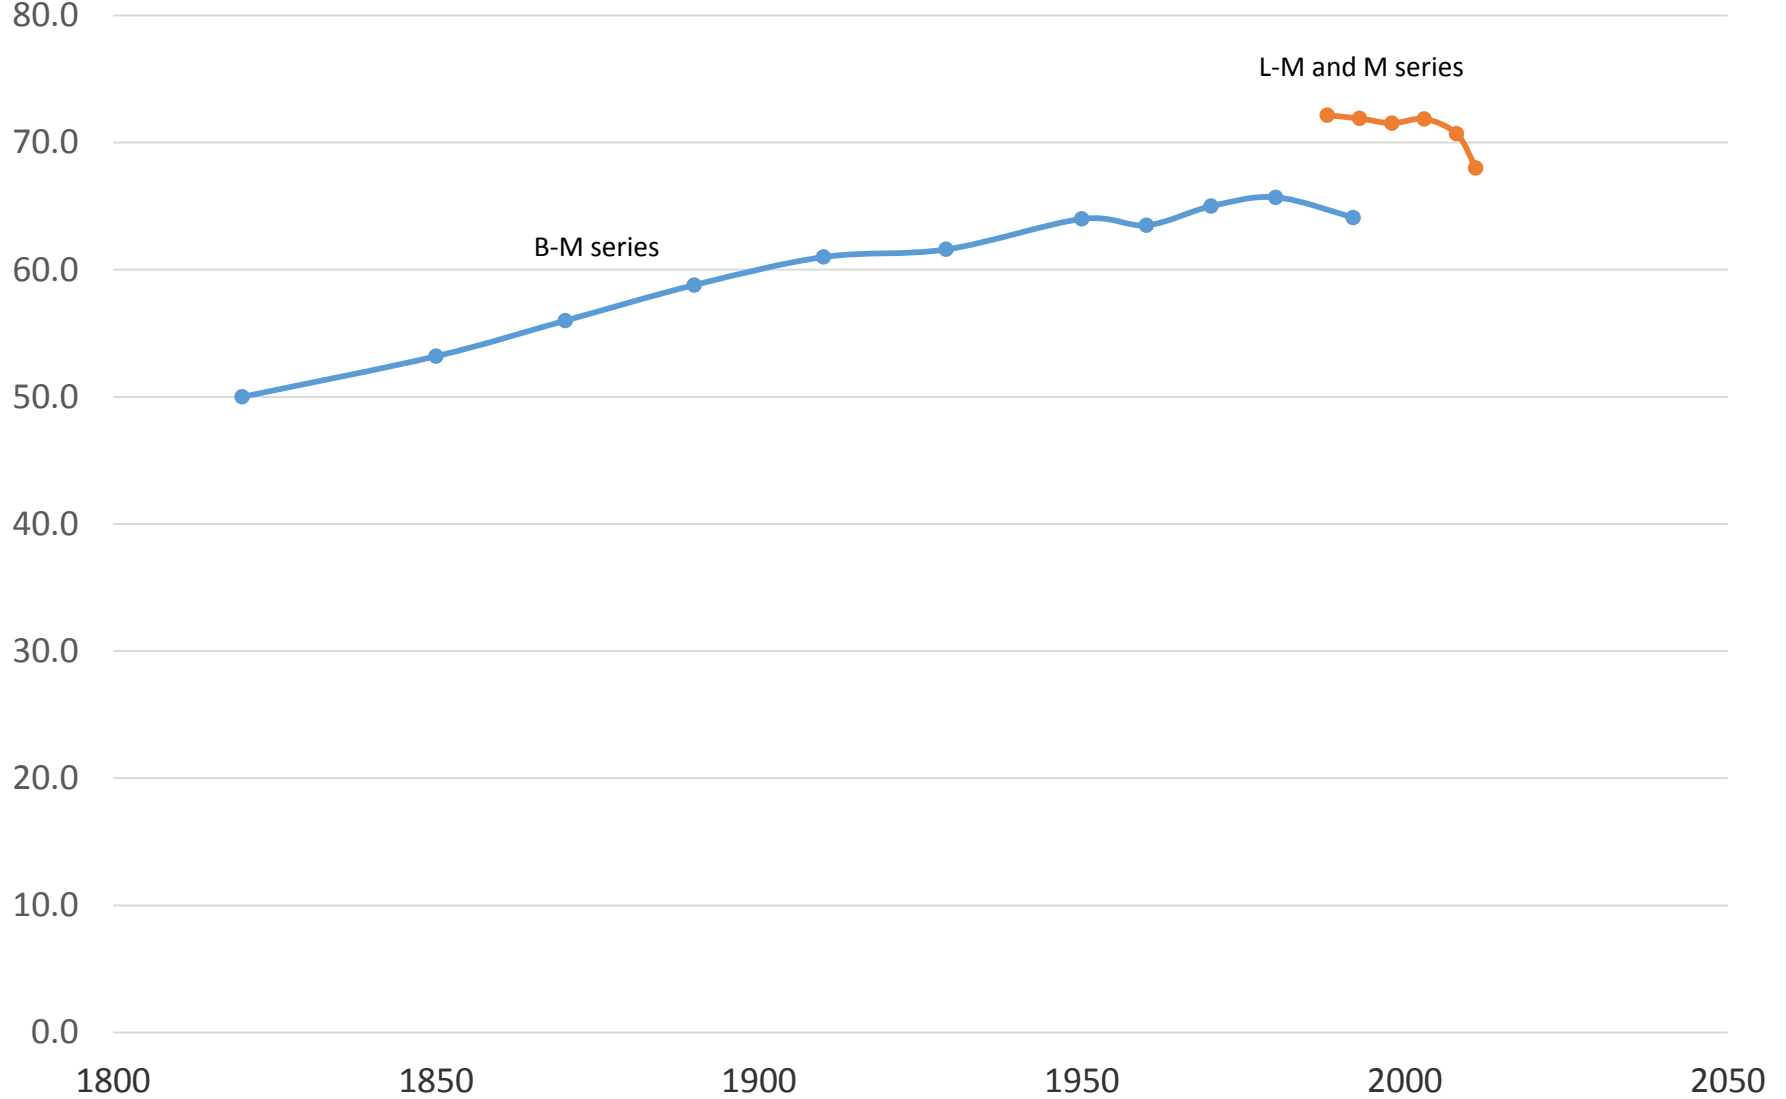

Branko Milanovic

Graduate Center CUNY and Luxembourg Income Study

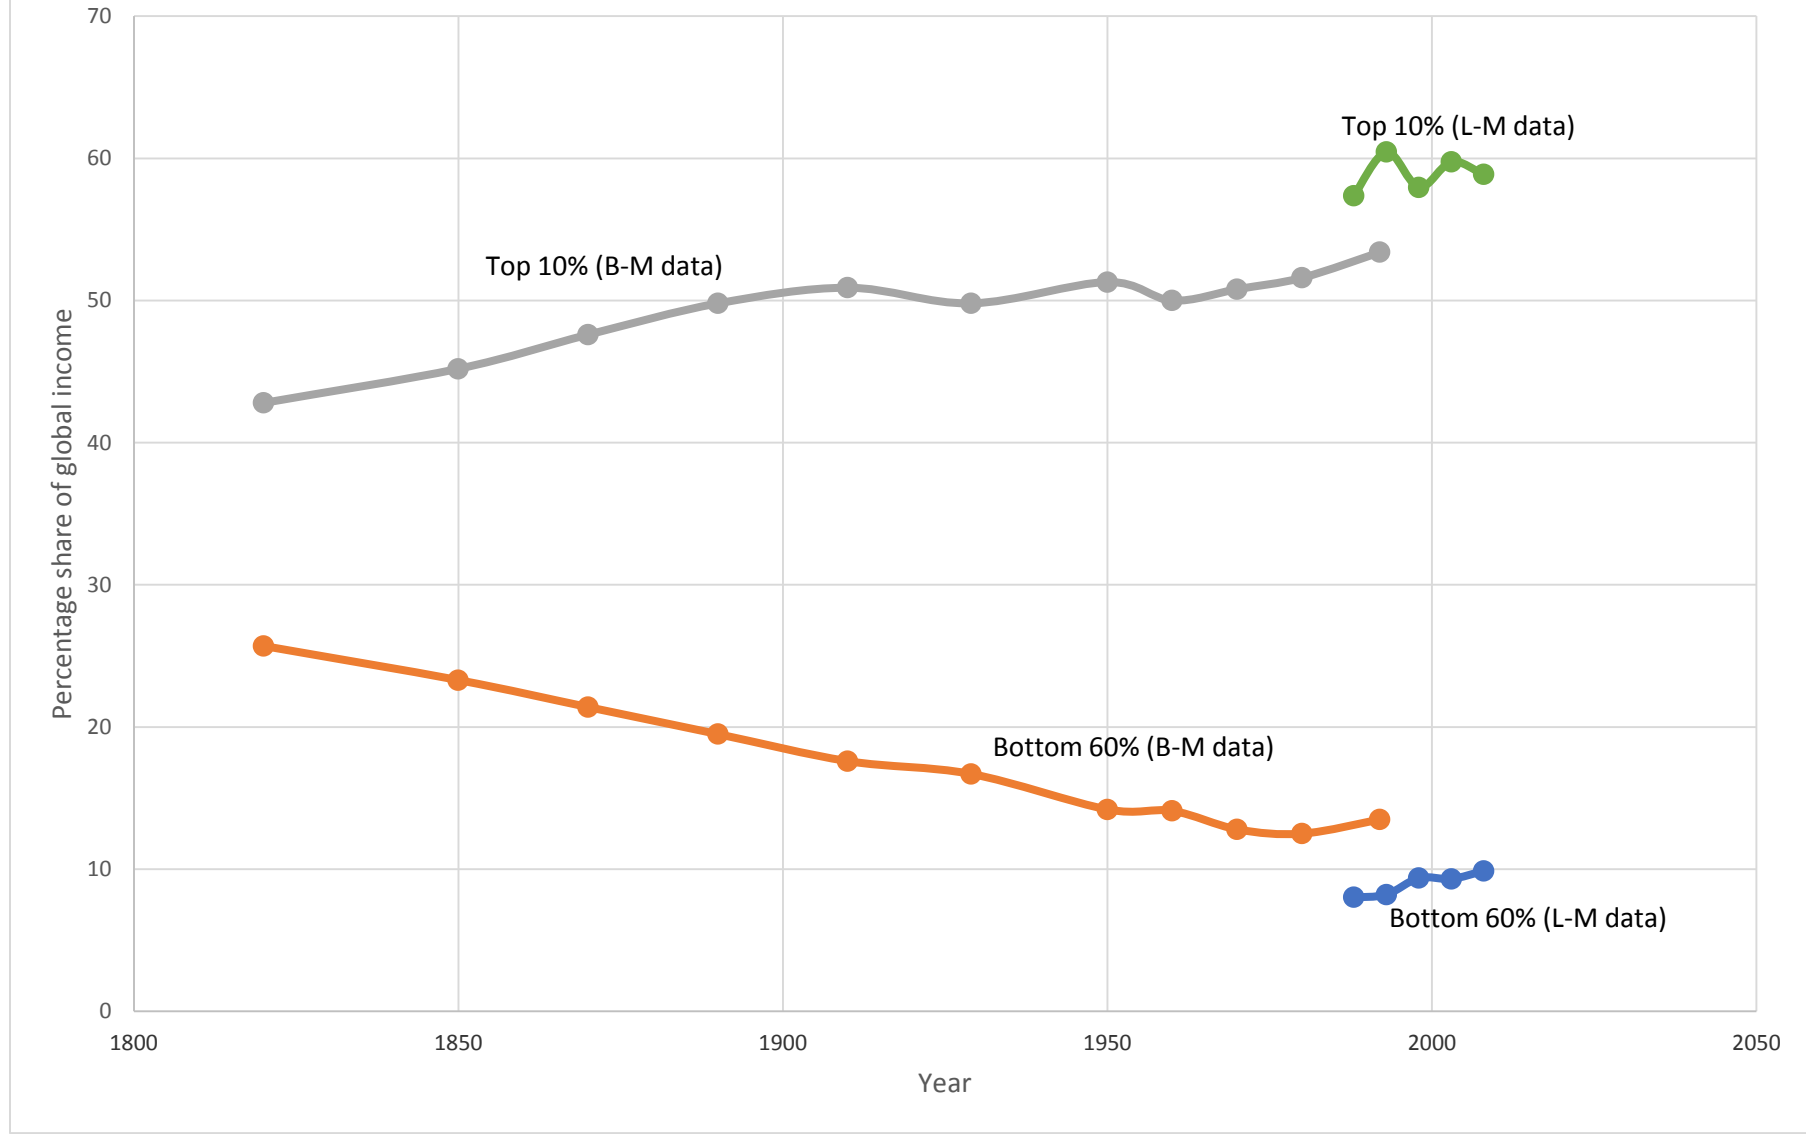

Boston 3 January 2015

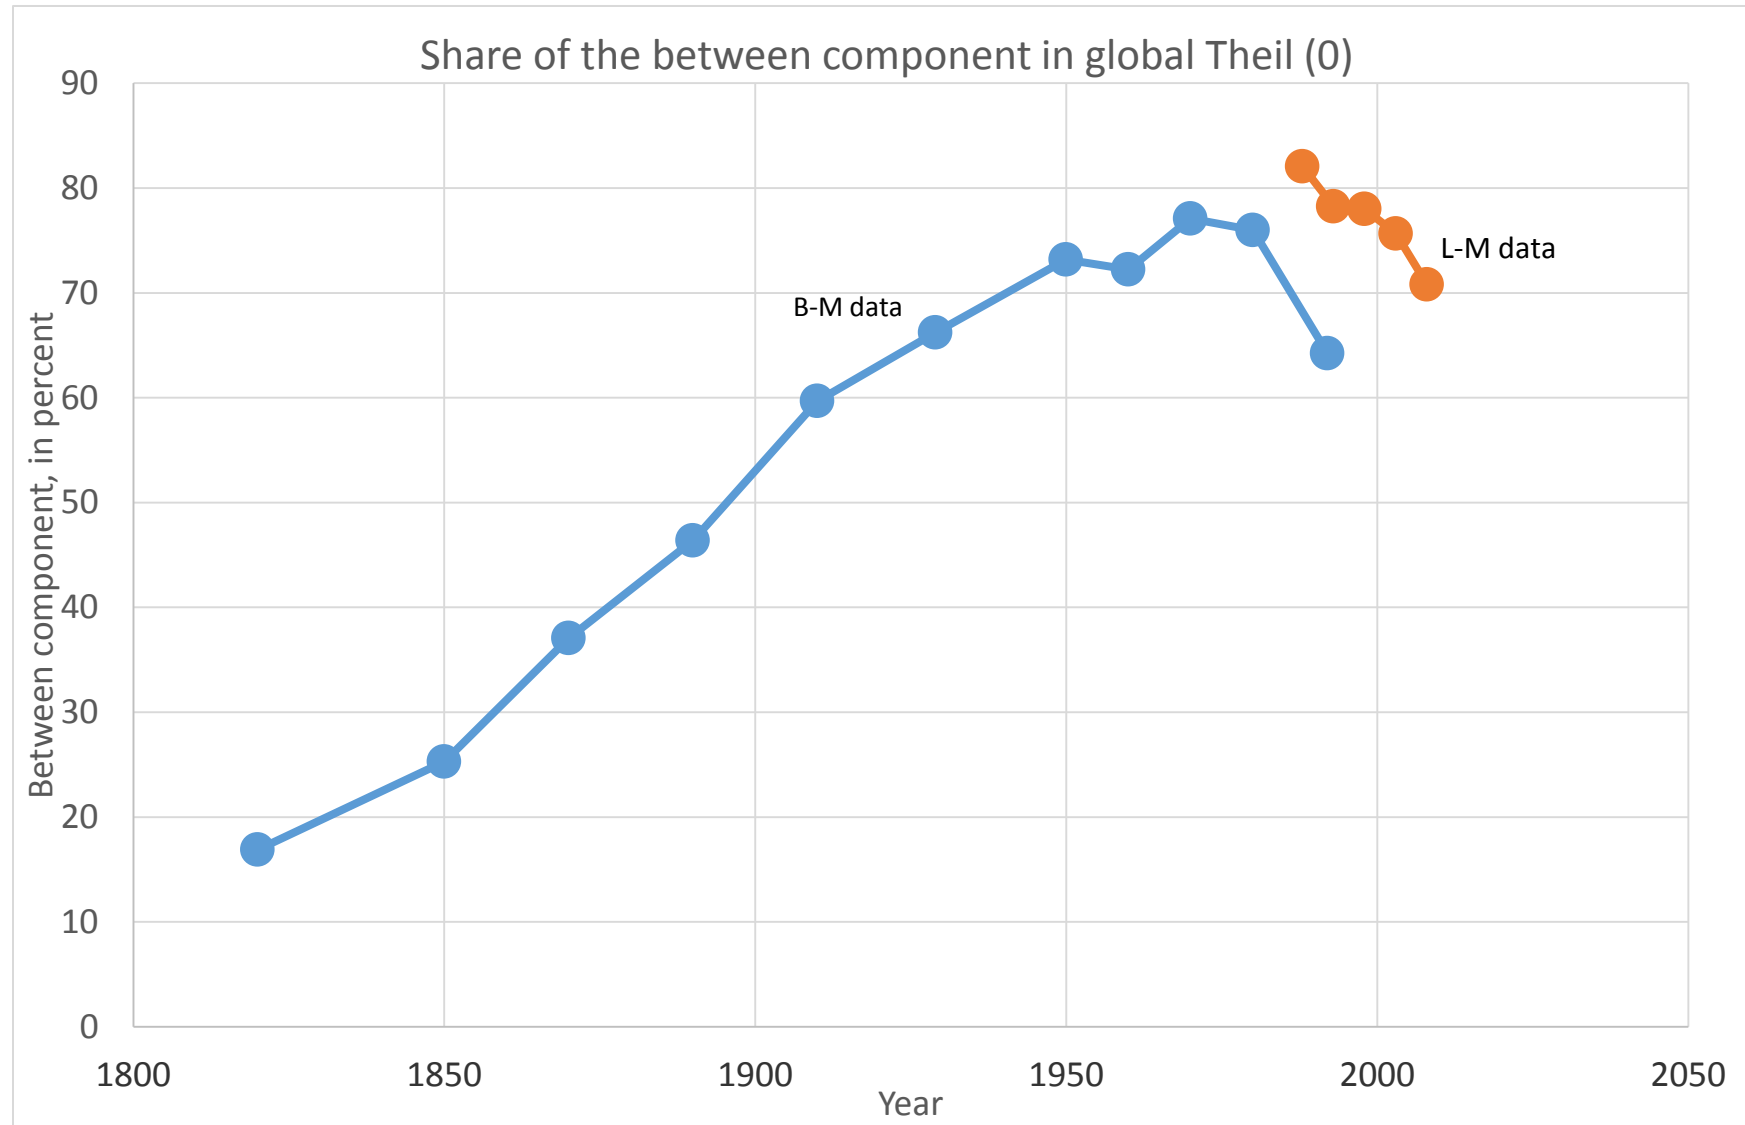

Global Gini 1820-2011

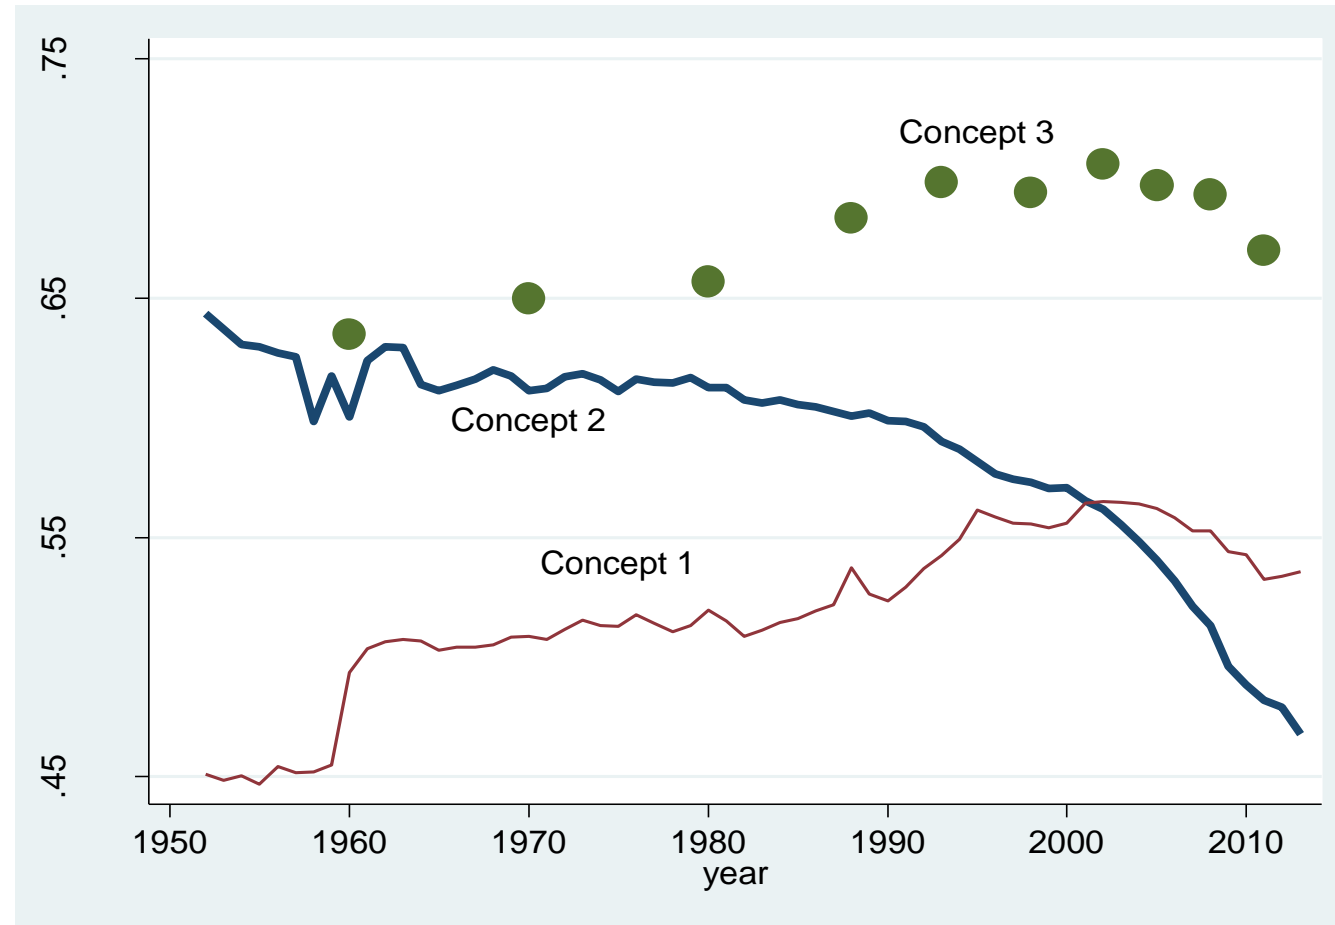

Shares of global income received by top 10% and bottom 60% of world population

Very high but decreasing importance of location in global inequality

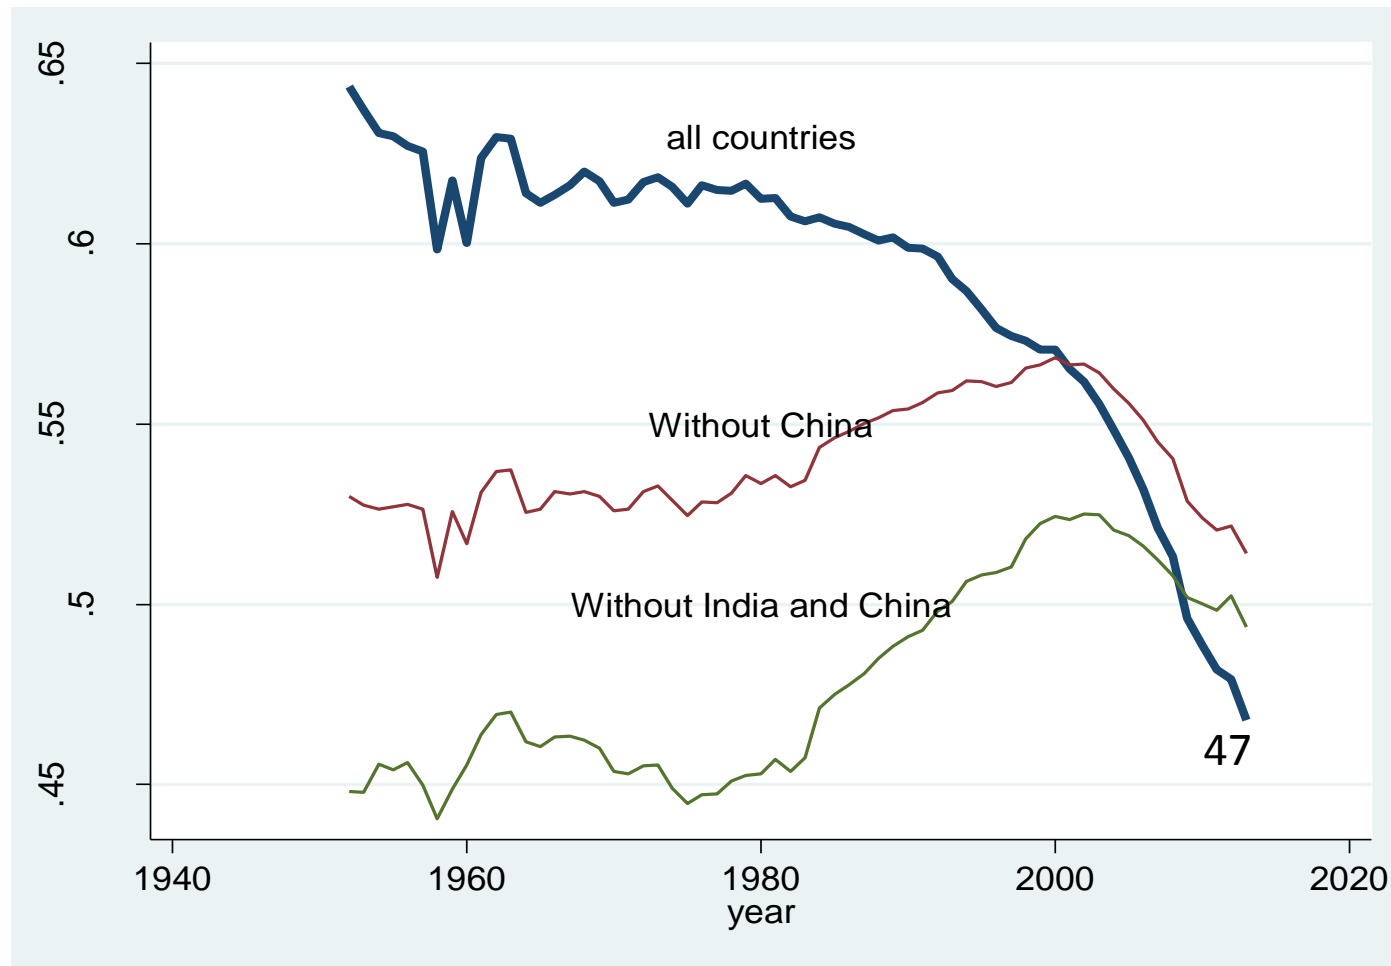

Global and international inequality after World War II

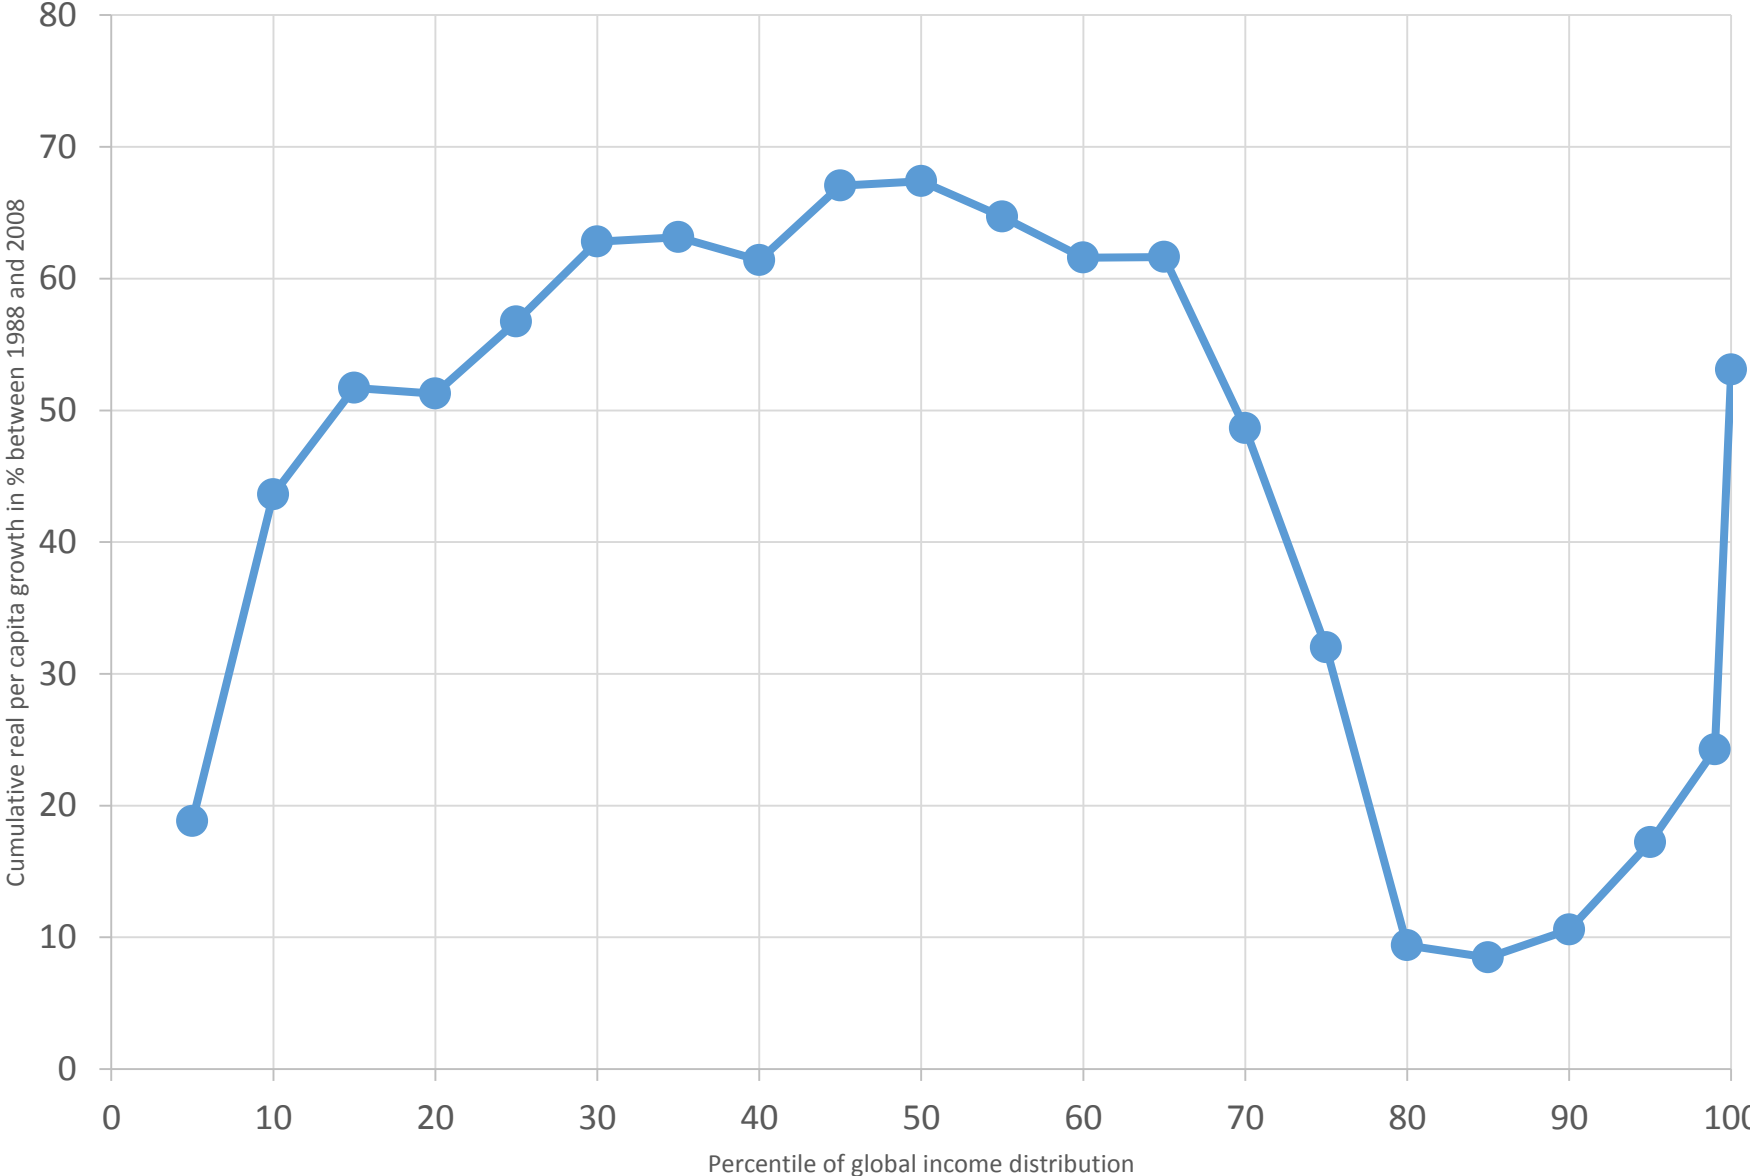

Concept2: 1960-1980 from Bourguignon & Morrisson

Branko Milanovic

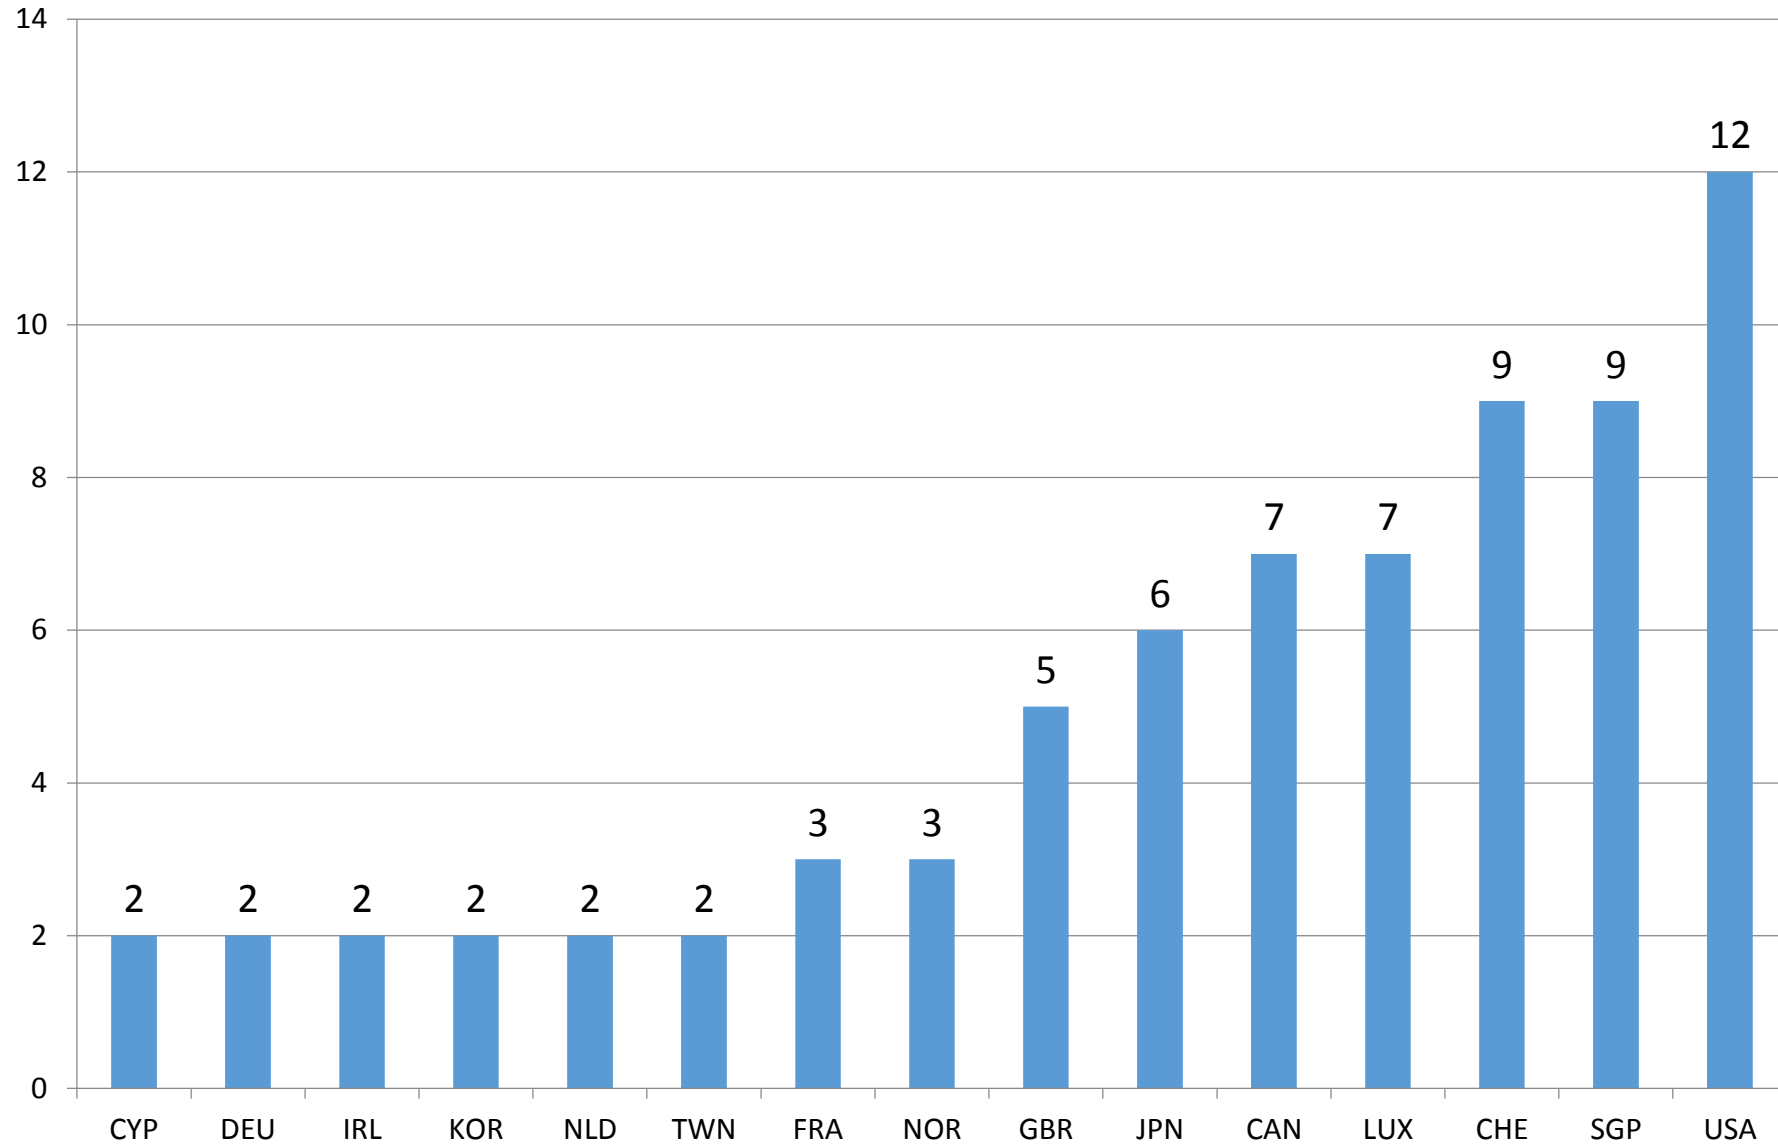

Concept 2 inequality with 2011 PPPs and without China and India

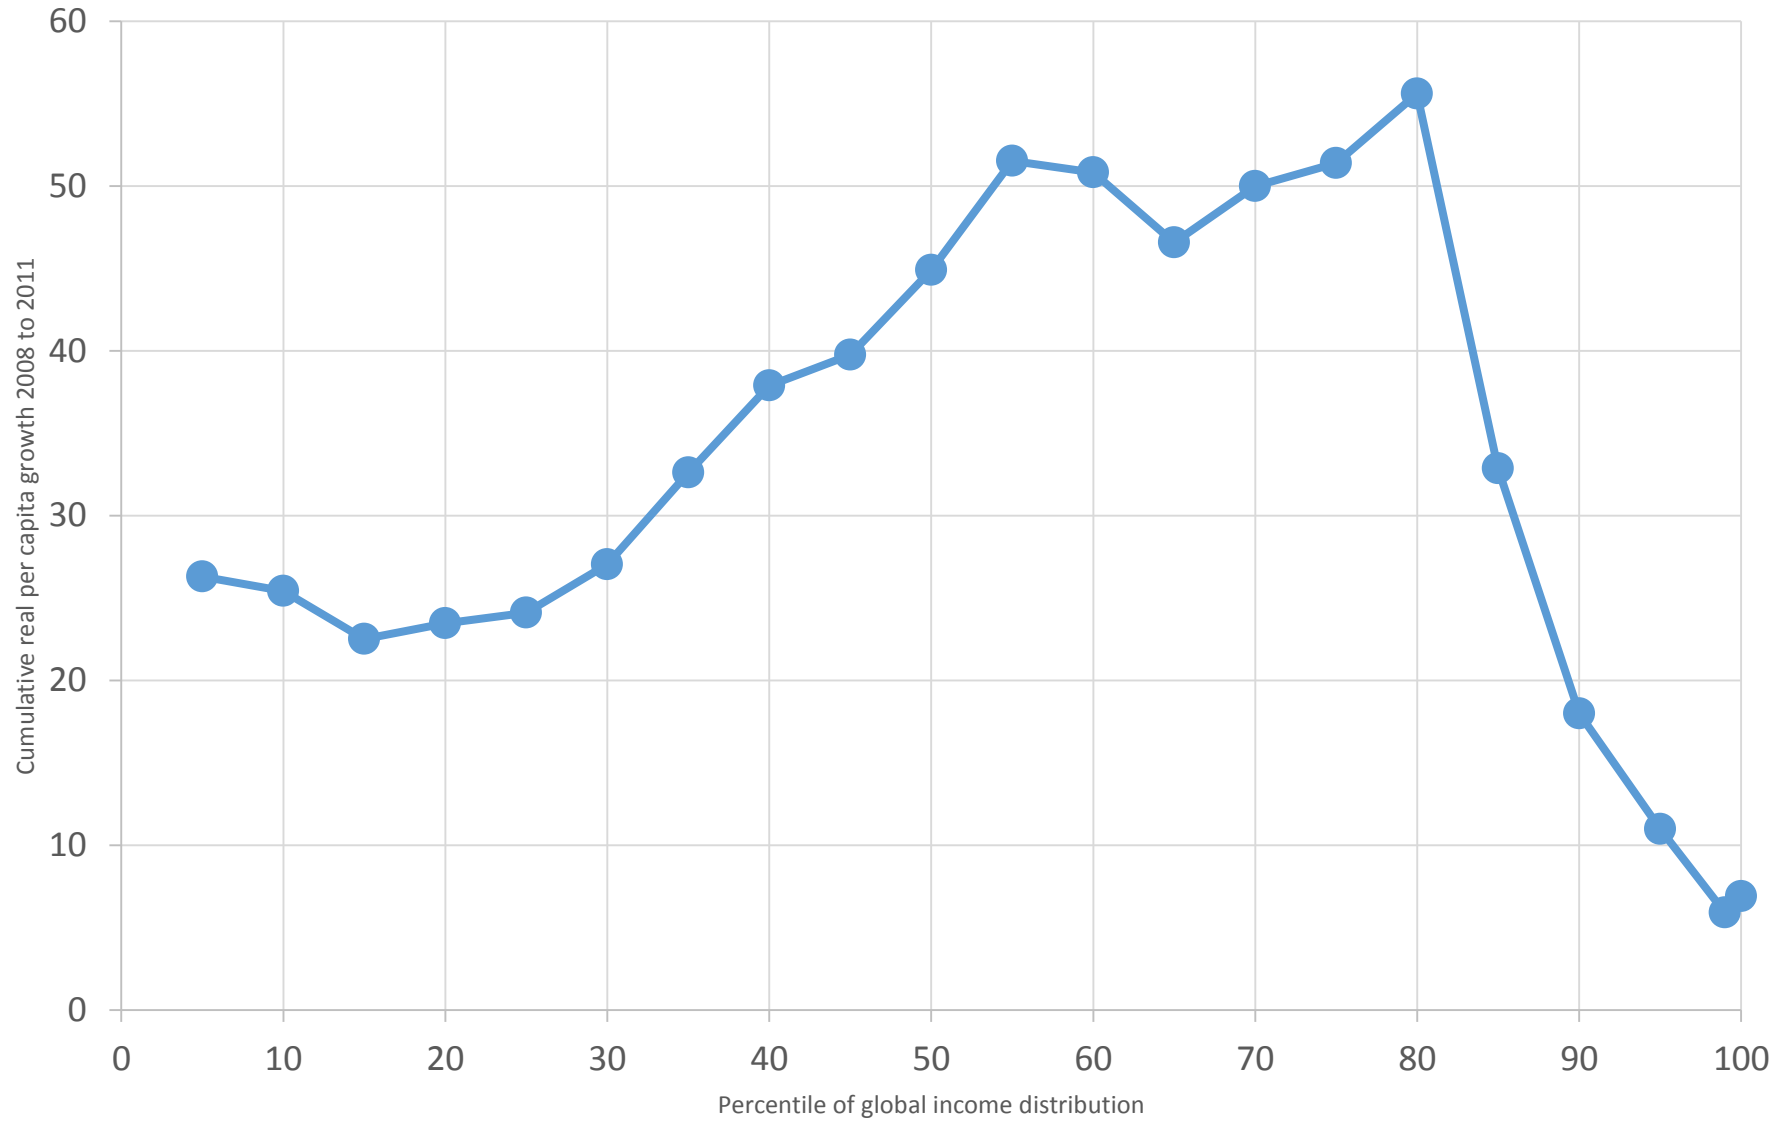

Real income growth over 1988-2008 period (based on 2011 PPPs)

Countries with more than 1% of their population in top global percentile (above \$PPP 72,000 per capita in 2008 prices)

Real income growth over 2008-2011 period (based on 2011 PPPs)

Lorenz curves 2008 and 2011
